

Vérification du débit sur le modem routeur Pirelli A124G

- Accédez à l'interface du routeur via l'adresse **192.168.1.254** puis tapez « **topadmin** » comme Login et mot de passe.

Username:

Password:

- Cliquez sur “ADSL” puis “Status”, vous trouvez le débit devant “Upstream” et “Downstream”.

The screenshot shows the TOPNET router web interface. The left sidebar contains a menu with 'ADSL' and 'Status' highlighted. The main content area is titled 'Monitoring Index:' and contains three sections:

- ADSL Status Information:** A box containing links for Status, Data Rate information, Default/Failure Indication, and Statistics.
- Status:** A table with columns 'Configured' and 'Current'.

	Configured	Current
Line Status	---	SHOWTIME
Link Type	---	Interleaved Path
- Data Rate:** A table with columns 'Stream Type' and 'Actual Data Rate'.

Stream Type	Actual Data Rate
Upstream	248 (Kbps.)
Downstream	506 (Kbps.)

There are 'Go Top' links at the bottom of each section.
